APPENDIX A TO PART 210—ALTERNATE FOODS FOR MEALS

I. ENRICHED MACARONI PRODUCTS WITH FORTIFIED PROTEIN

1. Schools may utilize the enriched macaroni products with fortified protein defined in paragraph 3 as a food item in meeting the meal requirements of this part under the following terms and conditions:

(a) One ounce (28.35 grams) of a dry enriched macaroni product with fortified protein may be used to meet not more than one-half of the meat or meat alternate require-

ments specified in §210.10, when served in combination with 1 or more ounces (28.35 grams) of cooked meat, poultry, fish, or cheese. The size of servings of the cooked combination may be adjusted for various age groups.

(b) Only enriched macaroni products with fortified protein that bear a label containing substantially the following legend shall be so utilized: "One ounce (28.35 grams) dry weight of this product meets one-half of the meat or meat alternate requirements of lunch or supper of the USDA child nutrition programs when served in combination with 1 or more ounces (28.35 grams) of cooked meat, poultry, fish, or cheese. In those States where State or local law prohibits the wording specified, a legend acceptable to both the State or local authorities and FNS shall be substituted."

(c) Enriched macaroni product may not be used for infants under 1 year of age.

2. Only enriched macaroni products with fortified protein that have been accepted by FNS for use in the USDA Child Nutrition Programs may be labeled as provided in paragraph 1(b) of this appendix. Manufacturers seeking acceptance of their product shall furnish FNS a chemical analysis, the Protein Digestibility-Corrected Amino Acid Score (PDCAAS), and such other pertinent data as may be requested by FNS, except that prior to November 7, 1994, manufacturers may submit protein efficiency ratio analysis in lieu of the PDCAAS. This information is to be forwarded to: Director, Nutrition and Technical Services Division, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, room 607, Alexandria, VA 22302. All laboratory analyses are to be performed by independent or other laboratories acceptable to FNS. (FNS prefers an independent laboratory.) All laboratories shall retain the "raw" laboratory data for a period of 1 year. Such information shall be made available to FNS upon request. Manufacturers must notify FNS if there is a change in the protein portion of their product after the original testing. Manufacturers who report such a change in protein in a previously approved product must submit protein data in accordance with the method specified in this paragraph.

3. The product should not be designed in such a manner that would require it to be classified as a Dietary Supplement as described by the Food and Drug Administration (FDA) in 21 CFR part 105. To be accepted by FNS, enriched macaroni products with fortified protein must conform to the following requirements:

(a)(1) Each of these foods is produced by drying formed units of dough made with one or more of the milled wheat ingredients designated in 21 CFR 139.110(a) and 139.138(a), and other ingredients to enable the finished food to meet the protein requirements set

7 CFR Ch. II (1-1-15 Edition)
